

## Specs of Slitting Machine

Machine Standard Size: LWH(3410mm\*2900mm\*2230 mm)

### **1. Major Specification**

Applicable width	2300mm, other width is customizable
Winding diameter	Φ500-Φ1000mm
Cutting-winding speed	0-50m/min
Power of motor	2.2kw/0.75kw

### **2. The Applicable Scope**

This machine is applicable to edge cutting and strip cutting of nonwoven cloth, artificial leather and other

### **3. Structure and performance of machine**

1) Its speed is adjusted by a frequency converter.

2) A hydraulic-infrared edge aligning system is adopted to improve edge-aligning precision.

3) The knife is directly driven by a high-speed motor

4) A pneumatic device is adopted to control vertical movement of the knife.
